Microwave Hood Combination Safety

**Your safety and the safety of others are very important.**

We have provided many important safety messages in this manual and on your appliance. Always read and obey all safety messages.

 This is the safety alert symbol.  
This symbol alerts you to potential hazards that can kill or hurt you and others.  
All safety messages will follow the safety alert symbol and either the word "DANGER" or "WARNING."  
These words mean:

**▲ DANGER** You can be killed or seriously injured if you don't immediately follow instructions.

**▲ WARNING** You can be killed or seriously injured if you don't follow instructions.

All safety messages will tell you what the potential hazard is, tell you how to reduce the chance of injury, and tell you what can happen if the instructions are not followed.

**IMPORTANT SAFETY INSTRUCTIONS**

To reduce the risk of injury to persons: Do not overheat the liquid. Stir the liquid both before and halfway through heating it. Do not use straight-sided containers with narrow necks. After heating, allow the container to stand in the microwave oven for a short time before removing the container. Use extreme care when inserting a spoon or other utensil into the container. Oversized foods or oversized metal utensils should not be inserted in the microwave oven as they may create a fire or risk of electric shock. Do not clean with metal scouring pads. Pieces can burn off the pad and touch electrical parts involving a risk of electric shock. Suitable for use above both gas and electric cooking equipment.*

*Intended to be used above ranges with maximum width of 36" (91.44 cm). Clean Ventilating Hoods Frequently - Grease should not be allowed to accumulate on hood or filter. Do not use paper products when appliance is operated in convection, combination, grill or "PAN BROWN" mode (on models with such features). Do not store any materials, other than manufacturer's recommended accessories, in this oven when not in use.*

*Do not store anything directly on top of the microwave oven when the microwave oven is in operation. When flambeing foods under the hood, turn the fan on. Use care when cleaning the vent-hood filter. Corrosive cleaning agents, such as lye-based oven cleaners, may damage the filter. Do not cover or block any openings on the microwave oven.*

*Do not store this microwave oven outdoors. Do not use the microwave oven near water - for example, near a kitchen sink, in a wet basement, or near a swimming pool, or similar locations. Do not immerse cord or plug in water. Keep cord away from heated surfaces. Do not let cord hang over edge of table or counter. Do not mount over a sink. Do not cover racks or any other part of the oven with metal foil. This will cause overheating of the oven. It is important not to defeat or tamper with the safety interlocks.*

*(b) Do not place any object between the oven front face and the door or allow soil or cleaner residue to accumulate on sealing surfaces. (c) Do not operate the oven if it is damaged. It is particularly important that the oven door close properly and that there is no damage to the: (1) Door (bent), (2) Hinges and latches (broken or loosened), (3) Door seals and sealing surfaces. *Observe all governing codes and ordinances.*

*Required: A 120 Volt, 60 Hz, AC only, 15- or 20-amp electrical supply with a fuse or circuit breaker. Recommended: A time-delay fuse or time-delay circuit breaker. A separate circuit serving only this microwave oven. For all cord connected appliances: The microwave oven must be grounded. In the event of an electrical short circuit, grounding reduces the risk of electric shock by providing an escape wire for the electric current.*

*The microwave oven is equipped with a cord having a grounding wire with a grounding plug. The plug must be plugged into an outlet that is properly installed and grounded. WARNING: Improper use of the grounding plug can result in a risk of electric shock. Consult a qualified electrician or serviceman if the grounding instructions are not completely understood, or if doubt exists as to whether the microwave oven is properly grounded. Do not use an extension cord.*

*If the power supply cord is too short, have a qualified electrician or serviceman install an outlet near the microwave oven..*
