

Xerox Disc Duplicators

Efficient and Reliable In-House Disc Production

The Xerox Duplicator is a fast and convenient way to make numerous copies of CD's, DVD's, and/or Blu-ray discs. With three offerings to choose from, (Standard CD/DVD, Blu-ray, or LightScribe Capable), makes the range of Xerox Duplicators suitable for any user. Each model offers units with the ability to produce from 1 up to 15 copies simultaneously from a single master source.

Standalone operation

The Xerox Duplicator can operate independently from a PC. The entire unit is operated from an easy to use LCD interface on the top front panel.

Transfer image files from a PC directly to the duplicator's Hard Drive (HDD)

Connect the duplicator to a PC by USB connection and transfer image files directly on to the duplicator's internal HDD. You no longer need to spend the extra time and effort to generate a master disc to initiate the duplication process.

Disc Labeling Capability

The Xerox Duplicator offers a line of disc labeling models, using LightScribe technology, which allows the user to print custom labels directly onto the top side of LightScribe capable CD or DVD media. The Xerox LS models are standalone systems with the added capability to transfer label designs from a PC via the Drag & Drop technology to print onto all LS capable discs in every recorder drive on the unit.

Supports all formats of CD, DVD and Blu-ray media

Xerox Duplicators support all common recordable and rewritable CD, DVD & Blu-ray formats as well as special items including CD-TEXT, ISRC, and Over-Burned CD.

Large capacity buffer memory

When making copies from the reader, large capacity buffer memory allows more data to be stored in flash from 8MB up to 256MB (depending on the model). It keeps all drives burning at the same speed without pausing (known as buffer under-run) for a more stable and reliable duplication at higher burning speeds.

Xerox Disc Duplicators
