Intraoral Camera

Installation Instructions

AIC 850

Turn power to transmitter on and off. Light will emit from end of camera when power is on.

Connect Camera wand cable to wireless transmitter if you desire wireless operation.

Turn power to transmitter on and off. Light will emit from end of camera when power is on.

Connect camera transmitter to the back of the camera.

Connect camera wand cable to docking station if you desire corded use.
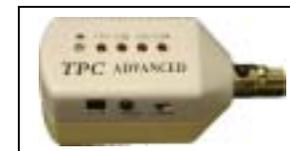

AIC815

1. Prior to using the TPC-WIC 850, AIC900 charge the Wireless Video Module TX until the power supplies LED turns back to green. It will be red while the unit is charging. After the charging period is over, it is recommended that the power charger be removed from the transmitter.
2. Disconnect power supply from Wireless Video Module TX "DC In" port.
3. Connect EZ Cam cord to Wireless Video Module TX "Cam" port.

AIC850

AIC888

AIC810

4.   Plug adv20 "switching power adapter" into Docking Station ADV-20 /AIC815 "DC 5VIN" port. Plug power supply into wall outlet.

AIC810

5.   Plug RCA jack or S-Video into Docking Station ADV-20 "AV Out" or "YC Out" port. Connect other end of video cable into Video Input port on monitoring device (pc or TV). Note you only need to use one video output S-video Or RCA.

AIC815

6. Plug RCA jack or S-Video into Docking Station AIC 815 "AV Out" or "S0video out" port. Connect other end of video cable into Video Input port on monitoring device. If you wish to use a USB 2.0 Connection to a computer use the supplied cable. Make sure you have the driver disc. Refer to the manual on the driver disc for help installing the drivers and software onto a PC. .

Notes: **Cameras that start with PA or NT, you will need to press the freeze button to activate the camera's LED's. This will turn the camera on. Then you will be able to see an image from the camera.**

Docking Station Settings: AIC800,805,810,815

- Switches 1-4 are to select the docking station's channels. Only one can be set to the on position. They must correspond to the transmitter's setting.
- The P and N are to select which system is being used. P is for PAL and N is for NTSC. This must match the camera SN. Look on the back of the camera to see if you SN# starts with a P or an N. Then determine which setting will work for your configuration.
- The W-L and W are to set the docking station to wireless or corded mode. W-L is for wireless and W is for corded.

Troubleshooting Guide

The remote to my camera does not work.

1.   Point the remote towards the lens of the camera, press any button and hold on the remote. You should see light flickering on the monitor. You must use the camera to see this because the human eye cannot detect this light.

2.   If there is no light try changing the battery in the remote.

3.   If problem persists call your local dealer.

There is no light coming from the end of my camera.

1.   Check to see if the transmitter is fully charged.

2.   Check the connection in the end of the camera wand cord.

3.   Hook the camera up directly to the receiver.

4.   If none of the three steps work, the camera may have internal damage. Contact your local dealer.
