FEATURES AND BENEFITS

1. Temperature Dial

Select desired temperature for the baking or broiling functions.

2. Function Dial

Select cooking method – bake, convection bake, broil, toast, or warm.

3. Timer Control Dial

Set cooking time up to 30 minutes. The oven will automatically turn off at the end of the cooking time. Or choose always On feature so that oven will continue to cook until you turn it off manually. To set the timer for less than 10 minutes, turn the timer past the 10-minute mark and then turn back to desired time. This will turn on the toaster oven broiler and the oven indicator light will turn on.

4. Oven On Indicator

Indicator light will remain lit when oven is in use.

5. Oven Rack

Has two positions. The top position has a 50% stop feature so the rack stops halfway out of the oven. It can be removed by lifting the front of the rack and sliding it out.

6. Slide-out Crumb Tray (not shown)

The slide-out crumb tray comes already positioned in your oven. The crumb tray slides out from bottom of the toaster oven broiler, in the front of the oven, for easy cleaning.

7. Cord Storage (not shown)

Takes up excess cord and keeps countertop neat.

8. Easy-Clean Interior

The sides of the oven are coated, providing an easy-to-clean surface.

9. Broiling Rack

A broiling rack fits into the drip tray/baking pan to use when broiling.

10. Baking Pan/Drip tray

A baking pan/drip tray is included for your convenience. Use with the broiling rack when broiling. Use alone when baking or roasting.

BEFORE THE FIRST USE

Place your oven on a flat surface.

Before using your oven, move it two to four inches away from the wall or from any objects on the countertop. Do not use on heat-sensitive surface.

OBJECTS SHOULD NOT BE STORED ON THE TOP OF THE OVEN. IF THEY ARE, REMOVE ALL OBJECTS BEFORE YOU TURN ON YOUR OVEN. THE EXTERIOR WALLS GET VERY HOT WHEN IN USE. KEEP OUT OF REACH OF CHILDREN.

GENERAL GUIDELINES

Baking: Baking function can be used as you would normally use your kitchen oven for roasting meats including chicken, or baking cakes, cookies and more.

Convection Bake: Convection baking/roasting uses a fan to circulate heated air around food as it cooks. For best results use cookie sheets with no sides and baking dishes and roasting pans with very low sides to let maximum air-flow reach food. For the same reason, do not cover foods while cooking.

Most baking recipes recommend reducing temperatures by 25 degrees when using the convection feature. Always check doneness 10 minutes before suggested cooking time.

Broiling: Broiling function can be used for beef, chicken, pork, fish and more. It also can be used to top-brown casseroles and gratins. **Caution:** Aluminum foil is not recommended for covering the broiling rack. If covered, the foil prevents the fat from dripping into the drip tray. Grease will accumulate on the foil surface and may catch fire. If you choose to use foil to cover the drip tray/baking pan, be sure foil is tucked neatly around the pan and does not touch the wall or heating elements.

Toasting: Always have the rack in rack position B, as indicated in the diagram on page 5, for even toasting. Always position your item/items in the middle of the rack.

WARNING: Placing the rack in the bottom position or in the top position with the rack upward while toasting may result in a fire. Refer to rack position diagram for proper use.

Turning off the toaster oven broiler: Turn the timer dial to Off. The indicator light will turn off.

USE AND CARE

Unwind the power cord. Check that the crumb tray is in place and that there is nothing in the oven. Plug power cord into the wall outlet.

Broil

Note: When broiling, add approximately $\frac{1}{4}$ cup water to the bottom of the drip tray to reduce sizzling and splattering. Place the broiling rack in the drip tray. The oven rack can be turned up or down depending on the thickness of the food being broiled. In most cases the oven rack should be in the higher position (position C – see rack position diagram on page 5).

To broil, set temperature and function dials to broil. Turn timer dial to desired time. To set the timer for less than 10 minutes, turn the timer past the 10-minute mark and then turn it back to desired time. Preheat oven for five minutes with door closed. After the five-minute preheat period, place the broiling pan in the oven. Always leave door ajar when broiling.

To stop broil operation, turn timer dial to off position.

Note: Never use glass oven dishes to broil.

Bake

To bake, turn the temperature dial to the desired temperature, turn function dial to bake position and turn timer dial to desired time. The oven indicator light will turn on. The timer can be set for up to 30 minutes. To set timer for less than 10 minutes, turn the timer past the 10-minute mark and then turn it back to desired time. At the end of the cooking time a bell will ring once and the oven will turn off automatically. If you select always "On" you will need to turn off the oven manually by turning the timer dial to the "Off" position. Preheat oven for five to ten minutes (time will vary depending upon desired temperature); then begin to bake.

Convection Bake

To use convection baking/roasting, turn the temperature dial to the desired temperature, turn function dial to convection bake position and turn timer dial to desired time. The oven indicator light will turn on. The timer can be set for up to 30 minutes. To set the timer for less than 10 minutes, turn the timer past the 10-minute mark and then turn it back to desired time. At the end of the cooking time, a bell will ring once and the oven will turn off automatically. If you select always "On", you will need to turn off the oven manually by turning the timer to the "Off" position. Preheat oven for five to ten minutes (time will vary depending upon desired temperature); then begin to convection bake or roast.

Most baking recipes recommend reducing temperatures by 25 degrees when using the convection feature. Always check 10 minutes before suggested cooking time.

Warm

To keep food warm, turn the temperature dial to 200°F; turn the function dial to warm position and set the timer dial to the desired time. The timer can be set for up to 30 minutes. The oven indicator light will turn on. Preheat oven for five minutes. Place food on the wire rack or in the baking pan. When warming, we recommend placing oven rack in the "B" position. (see rack position diagram below).

Toast

To toast, make sure the oven is in position B, as indicated in the diagram on this page. If toasting two items, center them in the middle of the rack. Four items should be evenly spaced – two in front, two in back. Six items should be evenly spaced – three in front, three in back. Close the glass door.

Shade Selection

Turn temperature dial to broil/toast 500°F. Set function dial to bake/toast. Turn the timer dial to desired shade setting from light to dark within the marked settings on this dial. To set the timer for less than 10 minutes, turn the timer past the 10-minute mark and then turn back to desired time. This will turn on the toaster oven broiler and the oven indicator light will turn on.

Stop Toasting

When the toasting cycle is finished, the oven will ring once and turn off. If you wish to stop the toasting cycle before it is finished, simply turn the timer dial to Off. The toaster oven broiler will cancel your toast cycle.

Important Notes on Toasting

The oven rack must be in position B as indicated in the diagram on this page.

CLEANING AND MAINTENANCE

Always allow the oven to cool completely before cleaning.

1. Always unplug the oven from the electrical outlet.
2. Do not use abrasive cleansers, as they will damage the finish. Simply wipe the exterior with a clean damp cloth and dry thoroughly. Apply the cleansing agent to a cloth, not to the toaster oven, before cleaning.

3. To clean interior walls, use a damp cloth and a mild liquid soap solution or a spray solution on a sponge. Never use harsh abrasives or corrosive products. These could damage the oven surface. Never use Brillo pads, etc. on interior of oven.
4. To remove crumbs, slide out the crumb tray and discard crumbs. Wipe clean and replace. Crumb tray is dishwasher safe. To remove baked-on grease, soak the tray in hot sudsy water or use nonabrasive cleaners. Never operate the oven without the crumb tray in place.
5. Oven rack, broiling rack and drip tray are dishwasher safe. If heavily soiled, soak in hot sudsy water or use a nylon scouring pad or nylon brush. Dry thoroughly after washing.
6. Never wrap the cord around the outside of the oven. Use the cord storage cleats on the back of the oven.

IMPORTANT

After cooking greasy foods and after your oven has cooled, always clean top interior of oven. If this is done on a regular basis, your oven will perform like new. Removing the grease will help to keep toasting consistent, cycle after cycle.

Sausage, Spinach and Fontina Quiche

Great for a Sunday brunch, this quiche will please any crowd.

Makes one 9-inch deep-dish quiche, 8 to 12 servings

- ½ recipe pâte brisée (see page 23)**
- 6 ounces sweet Italian sausage, casings removed**
- 2 tablespoons unsalted butter or olive oil**
- 2 garlic cloves, finely chopped**
- 2 cups packed baby spinach**
- ½ teaspoon table salt**
- ½ teaspoon black pepper**
- 1 cup whole milk**
- 1 cup heavy cream**
- 4 large eggs**
- 3 ounces fontina**

Roll out the dough into a 10-inch disc that is about ⅛-inch thick. Fit into an ungreased 9-inch deep-dish pie plate. Chill in refrigerator for about 20 minutes.

Preheat the Cuisinart® Convection Toaster Oven Broiler to 350°F on the bake function with the rack in position A. Using a fork, prick the dough evenly all over but make sure not to go entirely through the dough. Line the shell with parchment and weigh down with dried beans or rice. Bake in preheated oven for 20 to 22 minutes, or until the dough under the parchment

is no longer wet. Remove the beans/rice and parchment and continue baking until the shell is golden brown, about an additional 15 minutes. Remove; reserve.

Heat a skillet over medium-high heat. Add the sausage, breaking it up with a spatula or the back of a wooden spoon. Sauté until lightly browned; reserve. Do not clean out pan.

Add the butter to the hot pan. When it has melted, add the garlic and sauté until golden. Add the spinach, about a quarter-cup at a time, and a pinch each of the salt and pepper. Sauté until bright and wilted; combine with sausage and stir to combine; reserve.

In a medium bowl, mix the milk, cream, eggs and remaining salt and pepper. Using a Cuisinart® hand or stand mixer fitted with the whisk attachment, whip the mixture until completely combined. Spread the sausage/spinach mixture evenly on the bottom of the tart shell. Pour in the liquid mixture and top with the fontina.

Bake about 40 to 60 minutes, or until the quiche has browned on top and is just set.

White Pizza with Prosciutto, Arugula and Tomatoes

Makes one 12-inch pizza (8 servings)

- 1/3 recipe pizza dough (page 23)**
- 1 tablespoon extra virgin olive oil**
- 1 - 1½ ounces (about 4 to 6 slices) prosciutto, halved**
- 3 medium garlic cloves, finely chopped, divided**
- 1 cup halved grape tomatoes**
- 2 cups packed arugula**
- 1½ cups ricotta**
- ½ cup grated Parmesan (about 2 ounces)**
- pinch sea or kosher salt**
- ½ teaspoon freshly ground black pepper**

Preheat the Cuisinart® Convection Toaster Oven Broiler to 425°F on the bake setting with the rack in position A.

Roll out dough into a 12-inch circle.* Brush the outer edge of the dough with olive oil. Bake in preheated oven for about 6 to 8 minutes, or until dough is lightly golden.

While dough is baking, preheat a medium skillet over medium-high heat. Add the prosciutto. Sauté until crisp; remove and reserve.

Add 2 of the garlic cloves to the hot pan. Sauté until fragrant, and then add the tomatoes. When tomatoes just begin to soften, stir in the arugula, about ¼ cup at a time. Cook until the arugula is wilted; remove and reserve.

In a medium-sized bowl, mix the ricotta, Parmesan, remaining garlic, salt and pepper until well combined. Reserve.

Spread the ricotta mixture evenly over the par-baked pizza dough. Top the ricotta with the arugula mixture and then finish with the prosciutto. Bake pizza in preheated oven for about 10 to 12 minutes, or until the dough is nicely browned and the cheese is bubbling on top.

Remove the pizza from the oven. Cut into slices and serve immediately.

*Using a pizza mesh makes forming the perfect pizza much easier. If you have one, it is advisable to spray it with nonstick cooking spray before stretching dough.

Zucchini, Tomato and Onion Tart

Makes 10 servings

- ½ recipe pâte brisée (page 23)**
- 3 small zucchini**
- 2 small onions**
- 4 tablespoons extra virgin olive oil, divided**
- ½ teaspoon sea or kosher salt, divided**
- ½ teaspoon freshly ground black pepper, divided**
- 3 tablespoons grated Parmesan**
- 3 plum tomatoes**
- ½ - ¾ ounce soft goat cheese**
- 5 small basil leaves, thinly sliced (chiffonade)**

Roll and shape the brisée into a 12x4-inch rectangle. Fold up the edges to ¼-inch high. Refrigerate for about 30 minutes.

While dough is chilling, prepare the vegetables. Preheat the Cuisinart® Convection Toaster Oven Broiler to 425°F with the rack in the position B. Line the baking tray with aluminum foil.

Using a Cuisinart® food processor fitted with the 4mm slicing disc, slice the zucchini and onions. In a medium bowl, toss the sliced vegetables with 3 tablespoons of the olive oil and ¼ teaspoon each of the salt and pepper. Arrange in a single layer on the prepared baking tray. Roast for about 20 minutes, or until vegetables begin to brown and soften.

Reduce the temperature to 350°F and move the rack to position A.

Remove the tart shell from the refrigerator. Using a fork, prick the dough evenly all over but make sure not to go entirely through the dough. Line the shell with parchment and weigh down with dried beans or rice. Bake in preheated oven for about 20 minutes, or until the dough under the parchment is no longer wet. Remove the beans/rice and parchment and sprinkle with the Parmesan. Return to oven and continue baking until the shell is golden brown, an additional 2 to 3 minutes. Reserve.

While the tart shell is pre-baking, slice the tomatoes in the food processor using the same 4mm-slicing disc. Lay the slices on a towel-lined plate; sprinkle with the remaining salt. Reserve until ready to use.

Once the tart shell is baked, prepare the tart. Arrange the vegetables in the tart by tightly overlapping them in rows (start with one vegetable, allowing each row to be a different vegetable). Drizzle with the remaining tablespoon of olive oil and sprinkle with the remaining pepper. Dot the tart with pea-sized pieces of the goat cheese (use more or less, according to taste).

Place the tart in the preheated oven. Bake 20 minutes or until crust is fully browned and the vegetables are tender and golden. Remove from oven and sprinkle with the sliced basil.

Serve warm or at room temperature.

Transfer the vegetables back to the mixing bowl and toss with the corn, chicken, beans, cilantro, lime juice, spices, pepper and remaining salt.

Spread one quarter of the vegetable mixture in a line just below the center of each tortilla. Top each with one quarter of the cheese. Process for about 5 seconds, or until mixture is completely combined. Add the cold, cubed butter and pulse until mixture resembles coarse crumbs. Press into prepared baking pan. Bake in the preheated oven for about 16 to 18 minutes, or until lightly browned. Remove and reserve. Reduce temperature to 300°F.

While the crust is baking, add the eggs to a medium mixing bowl. Beat with a Cuisinart® hand mixer until lightened, about 30 seconds. Add the sugar and beat until light and thickened, another 1 to 1½ minutes. Add the lemon juice, vanilla and lemon zest and mix to incorporate. Add the baking powder, salt, flour and heavy cream and mix until combined. Pour mixture on top of the warm, prepared crust. Bake in the preheated oven for about 25 minutes, or until set.

Dust with confectioners' sugar before serving.

Cinnamon Cake with White Chocolate Glaze

Makes 16 servings

Cake:

- nonstick cooking spray**
- 1¼ cups cake flour**
- 1 teaspoon cream of tartar**
- ¼ teaspoon baking soda**
- 1 teaspoon table salt**
- ½ tablespoon ground cinnamon**
- ½ cup unsalted butter, room temperature**
- ¾ cup granulated sugar**
- ¼ cup packed light brown sugar**
- 3 large egg whites**

- 2** **teaspoons pure vanilla extract**
- ½** **cup whole milk**

Glaze:

- 6** **tablespoons heavy cream**
- ¼** **teaspoon pure vanilla extract**
- pinch table salt**
- ½** **tablespoon light corn syrup**
- 3** **ounces white chocolate, chopped**

Preheat a Cuisinart® Convection Toaster Oven Broiler to 350°F on the convection bake setting with the rack in position A. Coat a 9-inch cake pan with nonstick cooking spray; lightly dust with flour. Reserve.

In a small bowl, stir together the flour, cream of tartar, baking soda, salt and cinnamon; reserve. Add the butter to the bowl of the Cuisinart® Stand Mixer fitted with the flat mixing paddle. Beat until the butter is softened and creamy. With the unit running, slowly add the sugars; beat until light and fluffy. Add one third of the egg whites at a time, being sure not to add another one until the previous is completely mixed. Add the vanilla and mix to combine. With the unit running on the lowest speed, add half of the dry ingredients. Mix until the batter is streaky with flour and then add half of the milk. Continue with the remaining dry ingredients and carefully mix until no more flour is visible.

Pour batter into prepared pan. Bake for about 25 to 30 minutes, or until a cake tester comes out clean and the top of the cake springs back to the touch. Cool in pan for 10 minutes; remove and then cool completely on a wire rack.

Prepare the white chocolate glaze. In a small saucepan, add the cream, vanilla, salt and corn syrup and set over medium-low heat. Place the chopped chocolate in a small mixing bowl; reserve. Once the cream mixture just comes to a boil, pour it over the chopped chocolate. Let the mixture rest for a few minutes, and then whisk to combine. Pour the glaze over the cooled cake and spread evenly with an large offset spatula.

Transfer glazed cake to a refrigerator and let chill for at least 2 hours to allow the glaze to set up.

Caramel Walnut Tart with Raspberry and Chocolate

Makes 16 servings

- 2½** **cups chopped walnuts**
- ½** **recipe pâte sucrée (page 24)**
- 1½** **cups granulated sugar**
- 1** **cup water**
- 3** **tablespoons light corn syrup**
- pinch table salt**
- ½** **cup heavy cream**
- 1/3** **cup raspberry preserves, strained**
- 2** **ounces bittersweet chocolate, chopped**

Preheat a Cuisinart® Convection Toaster Oven Broiler to 400°F on the bake setting with the rack in position B. Line the baking pan with aluminum foil. Spread the walnuts on the prepared pan and toast for 4 to 5 minutes, or until fragrant and lightly browned. Cool to room temperature. Reduce oven temperature to 350°F on the convection bake setting and move the rack to position A.

Roll out the dough into a 10-inch disc that is about 1/8-inch thick. Fit into an ungreased fluted tart pan. Chill in refrigerator for about 20 minutes. Using a fork, prick the dough evenly all over but make sure not to go entirely through the dough. Line the shell with parchment and weigh down with dried beans or rice. Bake in preheated oven for about 20 minutes, or until the dough underneath the parchment is no longer wet. Remove the beans/ rice and parchment and continue baking until the shell is golden brown. Remove and reserve.

While the shell is baking, add the sugar, water, corn syrup and salt to a heavy-bottomed, medium saucepan. Wipe down with inside walls of the pan with a wet pastry brush to be sure that there are no sugar granules or water droplets in the pan – if the walls of the pan are not dry, it will hinder the quality of the caramel.

Cook the sugar mixture until it turns to an amber color. Once it achieves that color, take off from heat and slowly stir in the cream (note: the mixture will bubble quite a bit so it is important to do this step slowly and off the heat). Then stir in the toasted walnuts.

While caramel is cooking, spread the raspberry jam on the cooled tart shell. Pour the caramel-walnut mixture on top of the raspberry layer.

Place the chocolate in a bowl over a pot of simmering water. Once the chocolate is almost fully melted, remove from heat and stir to cool to room temperature. Drizzle chocolate over the caramel nut tart. Chill in refrigerator for 3 hours, or over night.
