Monitor Specifications

Power Management Modes

If you have VESA's DPM™ compliance display card or software installed in your PC, the monitor can automatically reduce its power consumption when not in use. This is referred to as 'Power Save Mode'*. If input from keyboard, mouse, or other input devices is detected by the computer, the monitor automatically resumes functioning. The following table shows the power consumption and signaling of this automatic power saving feature:

VESA Modes	Horizontal Sync	Vertical Sync	Video	Power Indicator	Power Consumption
Normal operation(with Dell Soundbar and USB active)	Active	Active	Active	Blue	147 W (maximum)
Normal operation	Active	Active	Active	Blue	117 W (typical)
Active-off mode	Inactive	Inactive	Blanked	Amber	Less than 3 W
Switch off	-	-	-	Off	Less than 1 W

This monitor is **ENERGY STAR**®-compliant as well as TCO '99 power management compatible.

* Zero power consumption in OFF mode can only be achieved by disconnecting the main cable from the monitor.

ENERGY STAR® is a U.S. registered mark. As an **ENERGY STAR**® Partner, DELL has determined that this product meets the **ENERGY STAR**® guidelines for energy efficiency.

Pin Assignments

24 pin digital-only DVI-D connector:
NOTE: Pin 1 is at the top right.

Universal Serial Bus (USB) Interface

This monitor supports High-Speed Certified USB 2.0 interface.*

	Data Rate	Power Consumption
High speed	480 Mbps	2.5W (Max., each port)
Full speed	12 Mbps	2.5W (Max., each port)
Low speed	1.5 Mbps	2.5W (Max., each port)

USB ports:

- l   1 upstream - rear
- l   4 downstream - 2 on rear; 2 on left side

NOTE: USB 2.0 capability requires 2.0 capable computer.

NOTE: Monitor's USB interface works ONLY when monitor is Powered ON (or in Power Save Mode). Switching your monitor OFF and then ON would re-enumerate its USB interface; attached peripherals may take a few seconds to resume normal functionality.

Plug and Play Capability

You can install the monitor in any Plug and Play-compatible system. The monitor automatically provides the computer system with its Extended Display Identification Data (EDID) using Display Data Channel (DDC) protocols so the system can configure itself and optimize the monitor settings. Most monitor installations are automatic; you can select different settings, if desired.

Card Reader Specifications

Overview

- l   The Flash Memory Card Reader is a USB storage device that allows users to read and write information from and into the memory card.

- l   The Flash Memory Card Reader is automatically recognized by Windows® 2000, XP and Vista.

- l   Once installed and recognized, each separate memory card (slot) appears as a separate drive/drive letter.

- l   All standard file operations (copy, delete, drag-and-drop, etc.) can be performed with this drive.

Features

The Flash Memory Card Reader has the following features:

- l   Supports Windows 2000, XP and Vista operating systems.

l   No Windows 9X support from Dell.

l   Mass Storage Class device (No drivers are required under Windows 2000, XP and Vista).

l   USB-IF certification.

l   Supports various memory card media.
The following table lists the slot to support what kind of memory card:

Slot Number	Flash memory cards type
1	Compact Flash type I/II Card (CF I/II)/CF form factor ATA hard drives to USB 2.0 bus
2	Smart Media Card (SMC)
	Memory Stick Card (MS) / High Speed Memory Stick (HSMS) / Memory Stick Pro Card (MS PRO) / Memory Stick Duo (with Adapter)

Caring for Your Monitor

⚠ **CAUTION: Read and follow the safety instructions before cleaning the monitor.**

⚠ **CAUTION: Before cleaning the monitor, unplug the monitor from the electrical outlet.**

- l To clean your antistatic screen, slightly dampen a soft, clean cloth with water. If possible, use a special screen-cleaning tissue or solution suitable for the antistatic coating. Do not use benzene, thinner, ammonia, abrasive cleaners, or compressed air.
- l Use a slightly-dampened, warm cloth to clean the plastics. Avoid using detergent of any kind as some detergents leave a milky film on the plastics.
- l If you notice a white powder when you unpack your monitor, wipe it off with a cloth. This white powder occurs during the shipping of the monitor.
- l Handle your monitor with care as darker-colored plastics may scratch and show white scuff marks more than lighter-colored monitor.
- l Tohelp maintain the best image quality on your monitor, use a dynamically changing screen saver and power off yourmonitor when not in use.

⚠CAUTION: Safety Instructions

⚠ **CAUTION: Use of controls, adjustments, or procedures other than those specified in this documentation may result in exposure to shock, electrical hazards, and/or mechanical hazards.**

Use the following safety guidelines to help ensure your own personal safety and to help protect your computer and working environment from potential damage.

- l   To help avoid damaging your computer, be sure that the voltage selection switch on the power supply for the computer is set to match the alternating current (AC) power available at your location:

    - o   115 volts (V)/60 hertz (Hz) in most of North and South America and some Far Eastern countries such as Japan, South Korea (also 220 volts (V)/60 hertz (Hz)), and Taiwan.

    - o   230 volts (V)/50 hertz (Hz) in most of Europe, the Middle East, and the Far East.

- l   Always be sure that your monitor is electrically rated to operate with the AC power available in your location.

NOTE: This monitor does not need or have a voltage selection switch for setting the AC voltage input. It will automatically accept any AC input voltage according to the ranges defined in the "Electrical Specifications" section in the User's Guide.

- l   Do not store or use the monitor in locations that are exposed to heat, direct sunlight, or extreme cold.

- l   Avoid moving the monitor between locations with large temperature differences.

- l   Do not subject the monitor to severe vibration or high impact conditions. For example, do not place the monitor inside a car trunk.

- l   Do not store or use the monitor in locations exposed to high humidity or dusty environment.

- l   Do not allow water or other liquids to spill on or into the monitor.

- l   Keep flat panel monitor in room temperature conditions. Excessive cold or hot conditions can have an adverse effect on the liquid crystal of the display.

- l   Never insert anything metallic into the monitor openings. Doing so may create the danger of electric shock.

- l   To avoid electric shock, never touch the inside of the monitor. Only a qualified technician should open the monitor case.

- l   Never use your monitor if the power cable has been damaged. Ensure that nothing rests on your computer's cables and that the cables are not located where they can be stepped on or tripped over.

- l   Be sure to grasp the plug, not the cable, when disconnecting the monitor from an electric socket.

- l   Openings in the monitor cabinet are provided for ventilation. To prevent overheating, these openings should not be blocked or covered. Avoid using the monitor on a bed, sofa, rug, or other soft surface, as doing so may block the ventilation openings in the bottom of the cabinet. If you place the monitor in a bookcase or an enclosed space, be sure to provide adequate ventilation and air flow.

- l   Place your monitor in a location with low humidity and minimum dust. Avoid places similar to a damp basement or dusty hallway.

- l   Do not expose the monitor to rain or use it near water (in kitchens, next to swimming pools, etc.). If the monitor accidentally gets wet, unplug it and contact an authorized dealer immediately. You can clean the monitor with a damp cloth when necessary, being sure to unplug the monitor first.

- l   Place the monitor on a solid surface and treat it carefully. The screen is made of glass and can be damaged if dropped or hit sharply.

- l   Locate your monitor near an easily accessible electric outlet.

- l   If your monitor does not operate normally - in particular, if there are any unusual sounds or smells coming from it - unplug it immediately and contact an authorized dealer or service center.

- l   Do not attempt to remove the back cover, as you will be exposed to an electrical shock hazard. The back cover should only be removed by qualified service personnel.

- l   High temperatures can cause problems. Don't use your monitor in direct sunlight, and keep it away from heaters, stoves, fireplaces, and other sources of heat.

- l   Unplug the monitor when it is going to be left unused for an extended period of time.

- l   Unplug your monitor from the electric outlet before any service is performed.

- l   Ⓗ LAMP(S) INSIDE THIS PRODUCT CONTAIN MERCURY AND MUST BE RECYCLED OR DISPOSED OF ACCORDING TO LOCAL, STATE OR FEDERAL LAWS. FOR MORE INFORMATION, GO TO WWW.DELL.COM/HG OR CONTACT THE ELECTRONIC INDUSTRIES ALLIANCE AT WWW.EIAE.ORG.

FCC Class B

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the manufacturer's instruction manual, may cause interference with radio and television reception. This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1 This device may not cause harmful interference.

2 This device must accept any interference received, including interference that may cause undesired operation.

NOTICE: The FCC regulations provide that changes or modifications not expressly approved by Dell™ Inc. could void your authority to operate this equipme

These limits are designed to provide reasonable protection against harmful interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference with radio or television reception, which can be determined by turning the equipment off and on, you are encouraged to try to correct the interference by one or more of the following measures:

- Reorient the receiving antenna.
- Relocate the system with respect to the receiver.
- Move the system away from the receiver.
- Plug the system into a different outlet so that the system and the receiver are on different branch circuits.

If necessary, consult a representative of Dell Inc. or an experienced radio/television technician for additional suggestions.

The following information is provided on the device or devices covered in this document in compliance with FCC regulations:
