### Mounting

1. If you are not completely comfortable doing this type of mounting and wiring project, seek help from a qualified service technician.
2. Consult the vehicle owner's manual and the manual for the stereo system prior to installing this device.

The Speaker can be top or bottom mounted. If there is no hole for mounting the Speaker, then a hole must be drilled at the point selected.
5. The speaker and power lines must be protected at contact points with the vehicle's body to prevent possible shorting.
6. Installation may require that a hole be drilled through which to insert the wiring.
7. The black wire with the white stripe is the positive connection and must be connected to the positive terminal on the pre-existing speaker. The solid black wire connects to the ground or negative terminal.
8. Properly insulate and cap off all wires.
