A compact case for notebook and printer, with trolley system.

The stable cabinet and the extra thick cushions in the notebook compartment offer the best protection for your mobile computing equipment.

Documents can easily be placed in their own compartment or in the separate document pocket whilst two side pockets offer further storage space for mobile accessories. Power supplies are stowed in the custom-designed ABS box.

All cables are laid inside the case which makes them almost invisible, devices are supplied with electricity via a single cable through a side opening.

To work with the notebook just remove it from the case, while the printer remains mounted on the front flap. The most effective means of mounting the printer is by using the 'QuickFix' mount which is available separately (optional).

With one quick grip the external bag can be removed from the rear of the case for separate carriage. The integrated trolley system takes the strain off your muscles so the mobile office can be moved with ease.

Specification:

Colour:	Black
Dimensions:	440mm x 380mm x 210mm OR 17.3" x 15.0" x 8.3"
